

Siddharth Mayya

University of Pennsylvania
3401 Grays Ferry Ave, Philadelphia, PA 19146

POST DOCTORAL RESEARCHER · Robotics · Bio-Physics Inspired Robot Swarms · Resilient Robot Teams

☎ (+1) 2674249734 | ✉ mayya@seas.upenn.edu | 🌐 www.sidmayya.com

Research Focus

Task Allocation In Heterogeneous Teams	High-level behavioral/task planning accounting for low level robot operations
Resilient Multi-Robot Teams	Leveraging heterogeneity for demonstrable resilience in multi-robot teams
Scalable Robot Swarms	Leveraging ideas from biology and physics for robust and scalable algorithm design

Education

Georgia Institute of Technology

Atlanta, GA

PHD IN ELECTRICAL AND COMPUTER ENGINEERING

August. 2016 - Dec. 2019

- Thesis: *Local Encounters in Robot Swarms: from Localization to Density Regulation*
- Advisor: Magnus Egerstedt
- GPA: 4.0/4.0

Georgia Institute of Technology

Atlanta, GA

MASTERS IN ELECTRICAL AND COMPUTER ENGINEERING

August. 2014 - May 2016

- Thesis: *Safe open-loop strategies for handling intermittent communications in multi-robot systems*
- Advisor: Magnus Egerstedt
- GPA: 4.0/4.0

Manipal Institute of Technology

Manipal, India

B.E. IN ELECTRONICS AND COMMUNICATION ENGINEERING

August. 2010 - June 2014

- Received 100% scholarship on college tuition.
- GPA: 8.98/10.00

Professional Appointments

University of Pennsylvania

Philadelphia, PA

POST DOCTORAL RESEARCHER (GRASP LAB, ADVISOR: VIJAY KUMAR)

Jan. 2020 - Jul. 2021 (expected)

- Sub-project leader (~15 people) for multi-institute collaborative effort (www.dcist.org) developing a ROS-based dockerized environment for full-stack robot swarm simulations in Unity (2021)
- Designed multi-robot coordination algorithms under limited communications and sensing using graph neural networks (2021).
- Developed a resilient task allocation paradigm for heterogeneous multi-robot systems (2020).
- Developed a mechanism for quantifying real-time capability degradation in a heterogeneous multi-robot team (2020).
- Investigated the connections between resilience and heterogeneous information flow in multi-robot systems (2020).
- Closed-loop control of ensemble clustering in a swarm of 500 vibro-actuated micro bristle-robots (2020).

Georgia Institute of Technology

Atlanta, GA

GRADUATE RESEARCH ASSISTANT (PHD, ADVISOR: MAGNUS EGERSTEDT)

Aug. 2016 - Dec. 2019

- Co-Designer of the Brushbot: a vibration-driven robot designed for large-scale low cost deployment (2019).
- Investigated how concepts from active matter physics can be used to achieve non-uniform densities in robot swarms (2018-2019).
- Developed an optimization framework for minimum energy task allocation in a team of robots with heterogeneous capabilities (2018).
- Developed algorithms to use inter-robot proximity encounters as an information source for achieving decentralized density regulation, localization and task allocation (2016-2018).
- Served as a firmware developer, circuit-board designer for the Robotarium project: an open-access swarm robotics platform at Georgia Tech (2015-2018).

Arizona State University

Tempe, AZ

VISITING SCHOLAR WITH DR. STEPHEN PRATT, SCHOOL OF LIFE SCIENCES

May 2018 - June 2018

- Investigated how *Temnothorax Rugatulus* ants utilize inter-ant encounters to detect quorum.
- Performed experiments on *Temnothorax Rugatulus* ant colonies with the aim of achieving non-uniform ant densities within the nest.
- Investigated the emergence of reverse tandem runs during disrupted emigrations of ant colonies.
- Used Open-CV to track the moving positions of ants within a colony via a camera.

Georgia Institute of Technology

Atlanta, GA

GRADUATE RESEARCH ASSISTANT (MASTERS)

Aug. 2015 - May 2016

- Developed reachability-based methods for handling intermittent communications in multi-robot systems.
- Developed an optimization based power-saving hybrid control strategy for multi-robot systems.
- Design and development of the GRITSBot: an open-source robot for use on the Robotarium.

Tesla Motors

Palo Alto, CA

AUTOPILOT INTERN

May 2015 - Aug. 2015

- Conceptualized schemes to diagnose anomalous driving conditions and realized them in embedded C. These schemes detect potentially dangerous conditions by taking into account factors such as vehicle dynamics, driver reaction times, and current road parameters.
- Developed a Software-In-Loop simulator to compute safety performance metrics using test-drive data.
- Implemented MATLAB scripts to automatically facilitate cross-checking of the simulator output with field data and generate statistics to fine tune the design parameters.
- Implemented a spline interpolation method to generate estimates of the road curvature based on intermittent trajectory and GPS data.

Manipal Institute of Technology

Manipal, India

TEAM LEAD, PARIKSHIT STUDENT SATELLITE TEAM

March 2011 - Dec. 2013

- Designed and successfully tested a three-axis PID control system for stabilization of the satellite.
- Managed a team of 7, supervising and aiding the design of attitude estimation algorithms, orbit determination algorithms, hardware design and system integration.
- Incorporated the Attitude Determination and Control System algorithm into the Real Time Operating System (RTOS) of the satellite. This included addressing various scheduling issues and developing firmware code.
- Designed and developed an integrated satellite environment simulator in MATLAB featuring modules for torque analysis, performance testing and orbital positioning. The whole system was later implemented in C.

Freescal Semiconductors

Noida, India

ANALOG & MIXED SIGNAL INTERN

Jan. 2014 - July 2014

- Designed and implemented Test Cases to verify specific functionalities of certain I/O Pads within a SoC.
- Deployed scripts to automate execution of test cases involving a large number of files.

Skills

Programming	Python (numpy, scipy, pandas, cvxpy, pydrake), C/C++ (STL, Eigen), MATLAB, Docker, Git, Bash, Micropython, Verilog
Hardware	Circuit Prototyping/manufacturing/SMD soldering, working with embedded devices, small motors
Languages	English, Hindi

Honors & Awards

2020	US Embassy Funded Project “What can robots teach us about the Covid-19 pandemic” , 2020 Alumni Small Grants Program	Rome, Italy
2019	Outstanding Paper Award Finalist , International Symposium on Multi-robot and Multi-agent Systems	Rutgers, NJ
2018	Among top 6 papers selected for Extended Publication in IEEE Transaction on Robotics , Robotics: Science and Systems Conference	Boston, MA
2018	Executive Vice President of Research Award for Best Poster , Career, Research and Innovation Development Conference	Atlanta, GA
2010	Full Tuition Fellowship Award , Manipal Institute of Technology	Manipal, India

Presentations

Invited Talks

Strength in Numbers: Swarm Robotics and Its Applications

BHABHA ATOMIC RESEARCH CENTER
Future Technologies Talk

Mumbai, India
Jul. 2017

Local Interactions as Information Sources in Robot Swarms

GEORGIA INSTITUTE OF TECHNOLOGY
Robotics Student Seminar Series

Atlanta, GA
Sept. 2018

Conference Talks and Presentations

International Conference on Robotics and Automation 2021

PAPER PRESENTATION

"Resilient Task Allocation in Heterogeneous Multi-Robot Systems"

Online Event
May 2021

Workshop on Heterogeneous Multi-Robot Task Allocation and Coordination, RSS 2020

SPOTLIGHT TALK

"A Resilient and Energy-Aware Task Allocation Framework for Heterogeneous Multi-Robot Systems"

Online Event
July 2020

Workshop on Resilient Robot Teams: Composing, Acting, and Learning, ICRA 2019

SPOTLIGHT TALK AND POSTER PRESENTATION

"Optimal Task Allocation in Heterogeneous Multi-Robot Systems Using a Mixed Centralized/Decentralized Strategy"

Montreal, Canada
May 2019

International Conference on Robotics and Automation 2019

POSTER PRESENTATION

"Voluntary Retreat for Decentralized Interference Reduction in Robot Swarms"

Montreal, Canada
May 2019

International Conference on Robotics and Automation 2017

SPOTLIGHT TALK AND POSTER PRESENTATION

"Safe open-loop strategies for handling intermittent communications in multi-robot systems"

Singapore
May 2017

Robotics: Science and Systems Conference 2017

SPOTLIGHT TALK AND POSTER PRESENTATION

"Collisions as Information Sources in Densely Packed Multi-Robot Systems Under Mean-Field Approximations"

Boston, MA
July 2017

Workshop on Robust Autonomy in Heterogeneous Robot Teams, RSS 2017

POSTER PRESENTATION

"Robust Autonomy in Centralized Multi-Robot Systems"

Boston, MA
July 2017

Teaching Experience

Research Mentoring

As a part of the ECE 8803 Special Research Topics course (Fall 2017), I provided research guidance and mentoring to 4 students over the course of a semester. This involved weekly meetings to discuss progress in their research and point them towards relevant results in the literature.

As a postdoctoral researcher at the GRASP Lab, I have had the opportunity to work alongside and provide research mentorship to undergraduate and graduate students.

Teaching Assistant & Co-Instructor

Georgia Institute of Technology. ECE 6553: Optimal Control and Optimization (Spring 2017)

Service

Outreach

1. Lead Organizer for workshop at ICRA 2021:

- Titled “Robot Swarms in the Real World: From Design to Deployment”
- hosted 200+ participants from 35 countries
- brought together experts from industry and academia
- fostered discussions on the challenges and opportunities in swarm robotics
- organized corporate sponsorship to increase participant engagement

2. Organizer of workshops, tutorials, and seminars:

Titled “What can robots teach us about the Covid-19 pandemic”, these events are funded by the US Embassy in Rome via the 2020 Alumni Small Grants Program. They will be organized for high-school and undergraduate students at multiple locations in Italy.

3. As part of the Robotarium project,

I participated in robotics outreach programs for K-12 students from diverse backgrounds across the US.

Peer Reviewer

1. IEEE Transactions on Robotics (T-RO)
2. IEEE Transactions on Automatic Control (T-AC)
3. IEEE Transactions on Automation Science and Engineering (T-ASE)
4. IEEE Robotics and Automation Letters (RA-L)
5. Swarm Intelligence
6. Automatica
7. SAGE Adaptive Behavior
8. IEEE International Conference on Robotics and Automation (ICRA)
9. IEEE International Conference on Intelligent Robots and Systems (IROS)
10. IEEE Conference on Decision and Control (CDC)
11. IFAC World Congress

Media Coverage
